DETAILED ACTION

Receipt of applicants' amendments and remarks submitted April 15, 2003 is acknowledged.

1. The terminal disclaimer filed on April 15, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,486,147 has been reviewed and is accepted. The terminal disclaimer has been recorded.
2. The amendments submitted April 15, 2003 further diversifies the claimed subject matters, and makes it necessary for the following restriction and election requirement.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 12, 13, 16-24, 27-33, and 36-45, drawn to a method of treating skin pigmentation marks, classified in class 424, subclass 401, 59; class 514, subclass 171, 169.
 - II. Claims 12, 13, 16-24, 27-33 drawn to a method of depigmentation and/or bleaching of skin wherein the treated skin does not have particular pigmentation marks, classified in class 424, subclass 401, 59; class 514, subclass 171, 169.
4. Inventions I and II are unrelated from each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different function and different effects. Particularly, group I is directed to treatment of abnormal pigmentation, and group II is directed to treatment of normal skin for lightening the skin color. They differ with respect to the subject and final results.

Art Unit: 1617

They therefore have different issues regarding patentability and enablement and represent patentable distinct subject matter.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Claims 12, 13, 16-24, 27-33, and 36-45, generic to a plurality of disclosed patentably distinct species comprising DHEA, its metabolic derivatives and biological precursors.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
